SUBJ: HRS Score - Resource Recovery, Pasco, WA

REF: TDD R10-8408-22

CC: Joan McNamee, USEPA
Rich Fullner, E&E, Seattle

It has been determined that there has been an insufficient amount of work done/data collected on the Resource Recovery site to accurately score the facility. However, E&E has been directed by the EPA to conduct a Field Investigation of this site. This work is scheduled to be completed in August 1985. It is therefore recommended that a final determination regarding the HRS Score for Resource Recovery be deferred until September 1985 when a more accurate scoring can be completed using data compiled during the Field Investigation.
